

NETFLIX MOBILE APP USABILITY TESTING REPORT

Course: UI/UX Design

Submitted by: _____Elwin Sam Mathew_____

NETFLIX

1. Introduction

This report evaluates the usability of the Netflix mobile application by observing two users while they complete common tasks. The purpose is to identify usability issues, measure task completion times, collect user feedback, and recommend improvements.

2. Objectives

- Evaluate ease of navigation.
- Measure task completion time.
- Identify usability issues.
- Collect user feedback.
- Suggest design improvements.

3. Participants

User	Age	Experience	Device	Netflix Usage
User 1	21	Experienced	Android	Daily
User 2	20	Beginner	Android	2-3 times/week

4. Test Environment

- Device: Android smartphone
- Network: Wi-Fi
- Method: Moderated usability testing
- Observer: One facilitator

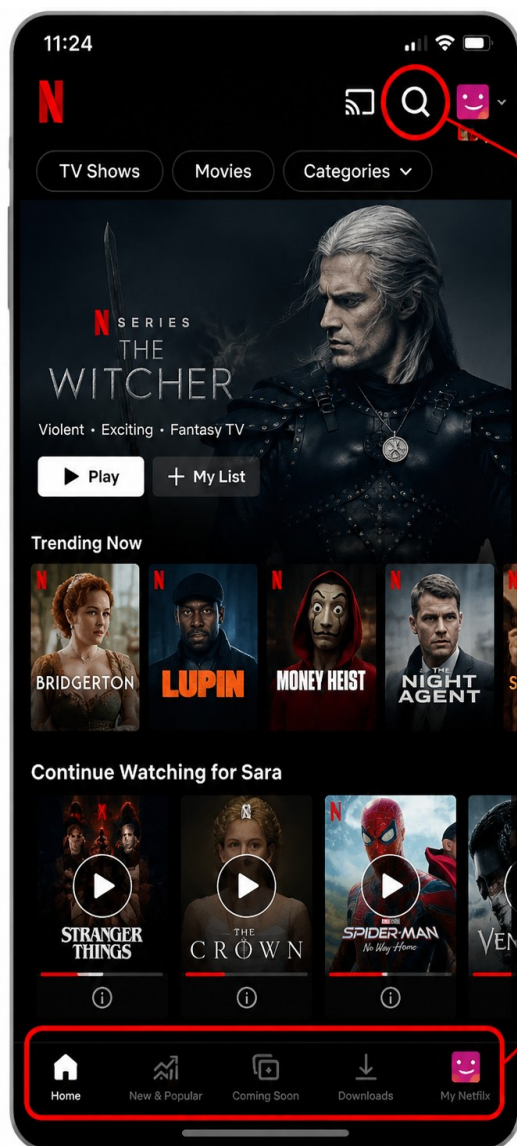

5. Test Tasks

1. Task 1: Sign in
2. Task 2: Search for 'The Witcher'
3. Task 3: Play the title
4. Task 4: Add to My List
5. Task 5: Enable English subtitles
6. Task 6: Sign out

6. Results

Task	User 1	User 2	Observation
Sign in	15 s	28 s	Completed
Search	12 s	20 s	User 2 searched twice
Play	5 s	8 s	Completed
My List	8 s	15 s	Icon confusion
Subtitles	10 s	22 s	Hidden settings
Sign out	18 s	35 s	Hard to locate

7. Problems Faced By User

SEARCH ICON

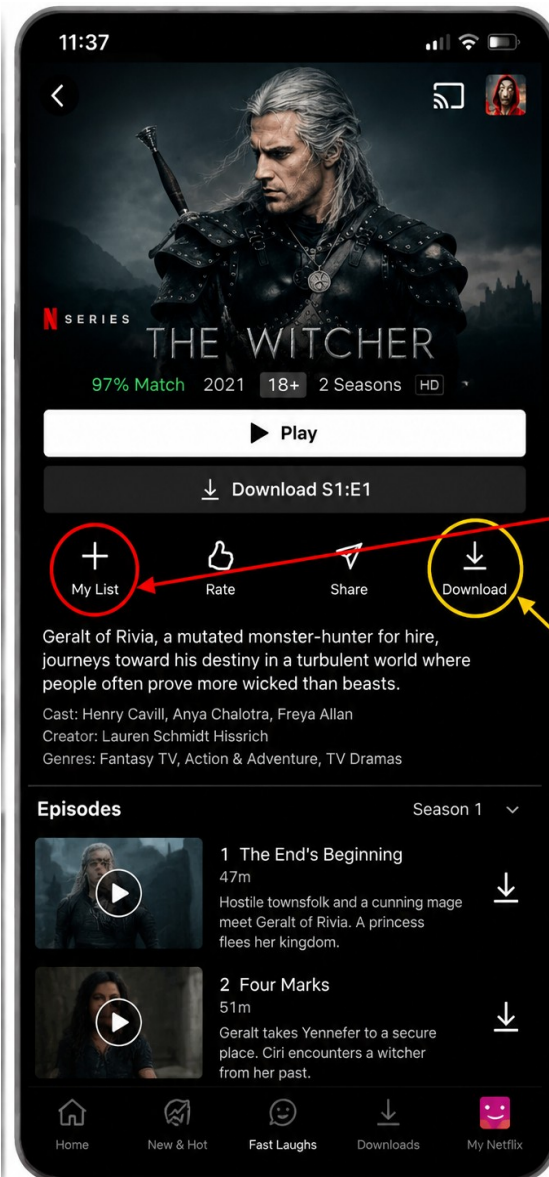

User 2 hesitated before locating the Search option.

BOTTOM NAVIGATION

Multiple icons with no text labels may cause confusion for some users.

Caption:

User 2 hesitated before locating the Search option.

+ MY LIST

Button is small and looks similar to the Download option.

DOWNLOAD OPTION

Users confused this with the My List button.

Caption:

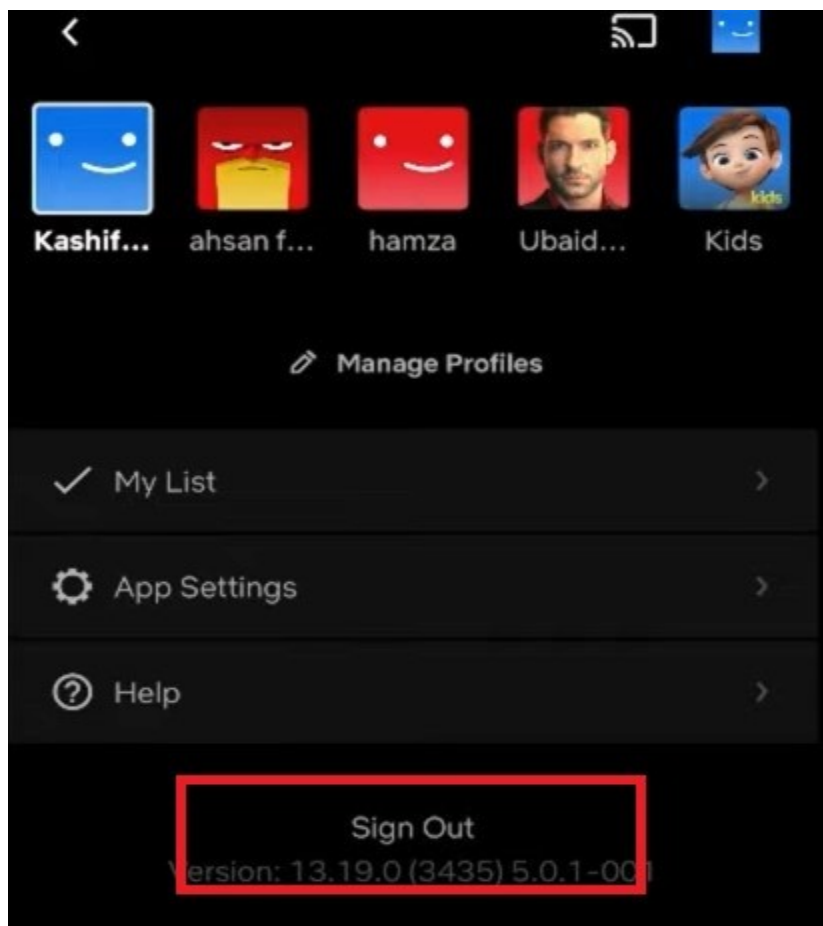

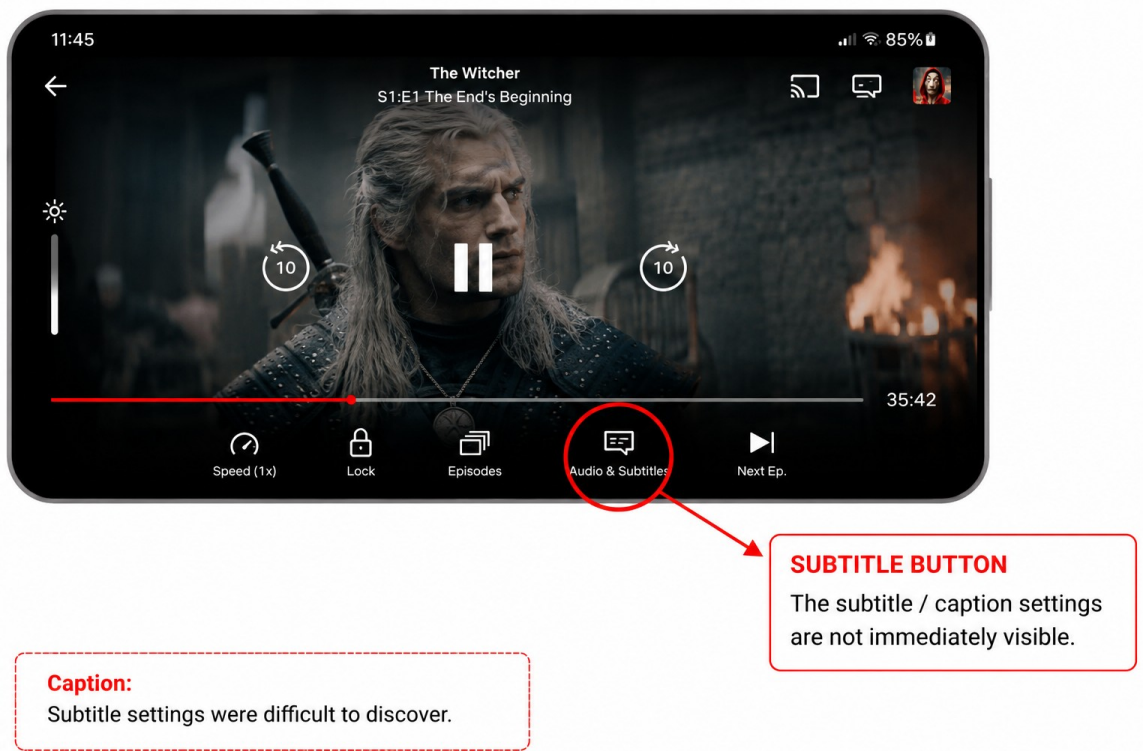

Users confused the My List button with the Download option.

- Logout option hidden inside Profile settings.
- Confusion between My List and Download icons.
- Subtitle settings not immediately visible.
- No confirmation after adding to My List.
- Small icons reduce discoverability.

8. User Feedback

User 1: "Navigation is smooth but logout is difficult to find."

User 2: "The icons were confusing and subtitles took time to locate."

9. Severity Matrix

Issue	Severity	Priority
Logout hidden	High	Fix first
My List icon confusion	Medium	Fix soon
Subtitle settings	Medium	Improve
Lack of feedback	Low	Optional

10. Suggested Improvements

- Move Sign Out to the main profile page.
- Increase icon size and add labels.
- Display confirmation after adding to My List.
- Provide onboarding hints for first-time users.
- Improve visibility of subtitle controls.

12. Conclusion

The Netflix mobile app offers a strong overall experience, but occasional users experience discoverability issues. Improving visibility of key features and simplifying navigation would enhance usability and reduce task completion time.
